### SENIOR FULL-STACK DEVELOPER

ITVOG > SINCE AUGUST 2019
LOME, TOGO

Itvog is a branch of a French company specializing in computer engineering. I am currently working here as a Senior Developer responsible for building, deploying and maintaining internal web sites and applications.

- Management of an Agile team of 7 web developers

- Definition of the technical specificities of the projects according to the requirements of the specifications. Creation of coding requirements to maintain quality work.

- Work closely with the UI/UX team to integrate high quality user interfaces with VUE JS (Vuetify, Element, Bootstrap) on solid and secure backends with MySql, PHP, LARAVEL or Slim framework in RESTful API documented with swagger. I have thus created or collaborated on more than 20 platforms and websites, including a social network.

- Code review and user experience optimization.

- System administration : Dedicated server management under LINUX

- Technical support for recruitment. This allowed me to interview more than 40 potential employees.

- Work with a committee of 3 members to organize fun activities for employees

## SYSTEM ADMINISTRATION

# FULL-STACK DEVELOPER

ARM MAURITIUS > NOV 2019 - SEPT 2020
PORT LOUIS, ILE MAURICE (Remote / part-time)

Digital Marketing Agency. I had to work on redesigns and complete creations of websites through well-defined specifications and project organization and management tools such as Trello, monday.com, slack and Gitlab for versioning

- Corrective and evolutionary maintenance of websites and e-commerce on WordPress (woocommerce)

- WordPress development: Creation or customization of plugins and themes. I developed more than 10 websites and web applications with MariaDB, PHP, WordPress, HTML, CSS, JavaScript, VUE JS, Twilio Messaging API, MailJet...

- SEO analysis and optimization, advertising campaign (Google ads, Facebook Ads, google analytics, Google search console)

- System administration: VPS under Centos 7 and a Dedicated Server under windows server 2016

# CREATIVE, MULTIMEDIA AND WEB MANAGER

UNICOM AFRICA > MARCH 2016 - MARCH 2019
LOME, TOGO

- Lead a team of 3 junior developers and 2 graphic designers

- Work closely with graphic designers, marketing team and clients to build elegant digital solutions: More than 8 web platforms designed including the site and management system of Caliente, a great annual New Year's Eve event in Togo.

- I actively participated as a creative leader on communication projects. I have created to measure and have printed posters and documents of any format (commercial brochures, project file, flyers, leaflets, kakemonos, agenda, notepads, etc.)

# DEVELOPER AND GRAPHIC DESIGNER

TOGO ASSISTANCE > APRIL 2014 - FEBRUARY 2016
LOME, TOGO

Ambulance company. I worked on the full life cycle of windows (Java swing) and web application development from requirements gathering to deployment

- I developed and upgraded an excellent and full internal management tool that improved the speed of processing subscribers data, claims by more than 90% for this noble company

- Planned, wrote and debugged web applications and software with complete precision

- Helped solve technical problems
